

Telehandler Range

Ultracompact, versatile and capable

AUSA EUROPEAN MANUFACTURER

Robustness, safety and versatility

The AUSA TAURULIFT® telescopic handlers are an ergonomic and safe solution for handling and transporting all types of material outdoors. **Ultracompact, versatile and capable**, they are designed to move large and heavy loads and they adapt easily to the most challenging and steep terrains.

The AUSA TAURULIFT® range provides professionals with a product that achieves an unparalleled balance of engine power and load capacity with low fuel consumption. The higher capacity models, T204H and T235H, are equipped with 36.5 kW KUBOTA V2403 engines, while the T144H features the 18.5 kW KUBOTA V1505 engine, which reduces its operating costs.

The telescopic side arm means that the machine has **smaller dimensions in terms of width** and provides better handling, whilst still allowing for a **spacious and comfortable cab**. Its position on the front axle also provides improved visibility for the driver and increased safety during loading and unloading operations.

The complete AUSA TAURULIFT® telescopic handler range features hydrostatic transmissions and a slow inching pedal and is designed to ensure **simple and safe driving**. It also facilitates approach and load-handling operations.

T 144 H

1,350 Kg all-terrain telescopic handler

Capable of lifting a maximum load of 1,350 kg and with a total lifting height of 4 metres, the T144H is the ultracompact telescopic handler design (1.4 m wide) with the lowest maintenance costs of its class. Thanks to the permanent 4x4 HET (High Efficiency Transmission) traction, the reduced turning radius and the high clearance, it is especially suitable for handling loads in limited spaces and on uneven terrain. All while maintaining good 360° visibility with a very advanced position, spacious and comfortable cab thanks to the side position of the telescopic arm.

T 144 H

Characteristics

T 144 H	1350	18,5	1405	H-4X4

Advantages

- With a width of just 1.4 metres and 2 metres high, it is the most compact telescopic handler on the market.
- Lightweight machine. With an unladen weight of 2,527 Kg, it can be transported on a conventional light trailer.
- Hydraulic function with quick connectors for accessories and implements, optionally with continuous and high flow.
- Excellent reach and load capacity ratio to the dimensions of the machine, thanks to its optimally counterweighted chassis.
- Thanks to its high manoeuvrability, the T144H obtains high productivity ratios in the handling, loading and unloading of materials.

Thanks to its reduced weight and compactness, the TAURULIFT T144H Plus can be transported on a conventional light trailer.

TRANSPORTABLE BY TRAILER

Safety system that indicates the load of the machine with an automatic limiter in case of overload.

LOAD INDICATOR

T 204 - 235 H

2,000 - 2,300 kg all-terrain telescopic handlers

The T204H and T235H models have been completely redesigned to offer the best user experience.

From the digital display of the driving position, the operator will be able to control any part of the machine and interact with and access the diagnostic menu and all maintenance parameters easily, quickly and efficiently.

Their compact size and their turning radii of just 2.9 metres give them excellent manoeuvrability and accessibility in tight locations, without sacrificing high payload and range capacities. They also have low transport costs. All with a very spacious and comfortable cab thanks to the side position of the telescopic arm.

AUSA's exclusive 4x4x4 permanent drive and front limited-slip differential.

Tilting cab that facilitates maintenance operations with practical access to components.

Three optional carriages: AUSA manual, UNIVERSAL quick coupling and EURO8 quick coupling.

Three cab solutions: open, semi-closed and closed with heating.

Great 360° visibility thanks to the advanced position cab on the front axle.

Three steering modes: front, full and "crab mode".

Joystick with full control of functions.

Digital screen with real-time information from all of the sensors and integrated self-diagnostics.

T 204 H

Characteristics				
T 204 H	2000	32,8	1590	H-4x4x4

- Advantages**
- 2,000 Kg of maximum capacity, 4.2 metres of maximum vertical reach and 2 metres of maximum horizontal reach.
 - Hydraulic function with quick connectors for accessories and implements, optionally with continuous and high flow.
 - Easy maintenance.
 - Gradeability under full load of 42%.
 - LED lighting system.
 - Large number of accessories and implements available.

T 235 H

Characteristics				
T 235 H	2300	32,8	1590	H-4x4x4

- Advantages**
- 2,300 Kg of maximum capacity, 5 metres of maximum vertical reach and 2.3 metres of maximum horizontal reach.
 - Hydraulic function with quick connectors for accessories and implements, optionally with continuous and high flow.
 - Easy maintenance.
 - Gradeability under full load of 42%.
 - LED lighting system.
 - Large number of accessories and implements available.

WARRANTY

From the minute you purchase your AUSA machine, it is covered by a warranty for 12 months or 1,000 service hours, which we can offer thanks to our experience and industrial know-how spanning over 60 years.

And if you want, you can increase your peace of mind by extending the warranty to up to 3 years, so that the only thing that you have to worry about is the next job you are going to do with your AUSA machine.

SPARE PARTS

Keep your AUSA equipment in perfect working order by only using original spare parts, as only they are the same as the top-quality components used to manufacture it. Installing other spare parts may prevent it from working properly and reduce its service life.

Always demand the installation of original spare parts to ensure the complete reliability and durability of your machine.

AUSA's official dealers make sure that original spare parts are available everywhere in the world.
